

INTRODUCING 2 NEW PRODUCTS

FASTRAX XL

The safety and energy saving benefits of Rite-Hite FasTrax Doors can now be found in a super-sized version. The FasTrax XL is now available in sizes up to 24 feet by 24 feet (7315mm x 7315mm).

Designed to withstand harsh weather and high wind speeds, the FasTrax XL is the ideal door for facility managers looking to increase efficiency into and out of the building.

ECLIPSE NH

Rite-Hite introduces the ECLIPSE NH dock shelter, designed to provide the tightest seal possible at loading docks that serve liftgate trailers or require the opening of trailer doors inside the building for security purposes.

Dock openings are sealed up on all four sides, preventing energy loss, reducing infiltration of contaminants into the building, and blocking daylight in quality control inspections.
