## NEW YEAR, NEW GOALS, NEW SOLUTIONS

It's a new year and 2016 is already bursting with possibilities. You've probably already identified new objectives and set goals to be the SMARTEST, QUICKEST and BEST company in your industry. But what about your goals for making your workplace a safer place to work? Have you thought about that?

According to the United States Department of Labor, "Before OSHA was created 43 years ago, an estimated 14,000 workers were killed on the job every year. Today, workplaces are much safer and healthier, going from 38 fatal injuries a day to 12. But there is still much work to be done."

Rite-Hite has the **solutions** to help you reach your safety goals. Together we can make 2016 your company's SAFEST year yet!

### Not All Barriers Are Created Equal

#### The Science of Safety

Rite-Hite has recently developed a new scientific approach to help determine which safety barriers are best for your facility and application.

B.L.A.S.T. - Barrier Load and Speed Testing focuses on energy absorption instead of simply weight and speed.

Discover all our safety barriers and the story behind the Science of Safety.

### Application Photo of the Month

A Rite-Hite customer needed a way to protect their forklift charging station within the facility, so a **Sure-Stop Barrier System** was installed to protect the chargers. This gusseted barrier has the ability to stop a forklift with little to no deflection.

### And the Winners are...

In December, we asked you to tell us more about yourself and your business for a chance to win one of two \$50 Amazon gift cards. Congratulations to our winners, **Brooks from Clearwater Paper Corp.** and **William from Choate Construction**. Thank you to everyone who participated!
